

Markdown-Exercise-Sheet

This sheet is here to get to know of the Syntax of Markdown

For Example '#' are used to mark headlines

There are

up

to six

different headlines

This text is written in *italic*, and now in **bold**

You can also use some HTML- and CSS-tags in your Markdown-Sheet, to make your Markdown-Sheet even fancier

Don't click on this [link](#)!

To separate phrases it is important to have two newlines between phrases

This paragraph is only separated with one newline

This paragraph is...

separated with two (could be even more) newlines

So you can write tons of notes in each line, and Markdown won't separate these line without an empty newline.

Hopefully this is a helpful cheat sheet for Markdown!
